

PowerHouse-120.3 features & specifications

1560 watts Max. 260 watts RMS x 3 in 4-ohm mono

WARNING The gain knob is not a volume control. It is designed to match the input level of the amp to the output level of the source unit. Overdriving -clipping- the input stage of the amp will cause damage to the amplifier (please refer to table for setting).

| GAIN KNOB SETTING | | |
|-----------------------------------|------|-------|
| MAX INPUT VOLTAGE BEFORE CLIPPING | MIN | MAX |
| 5V | 3.5V | 0.28V |
| | 12 | 3 |
| | 9 | 0.5V |
| | | 0.20V |
