(D) Depth	11"	11"	7"	7"

Gold plated binding posts

Vari-mount  
SLAPS Passive Radiator Technology

### OBJECTIVE

#### Different, Superior, Elaborate and Majestic

The PN4521Black floor-standing speakers are the *piece de resistance* of the Platine Noirée system. They are made differently from any loud speakers, both inside and out. Access to the best technology and precision tools allowed Earthquake Sound to combine superior cabinet materials, new driver materials, top-grade copper cabling and the most elaborate crossover components available into one majestically designed package.

### INTENDED USE

- ✓ Contractors, Custom Installers & Retailers
- ✓ High-end home Theater & 2-Channel Music Systems
- ✓ Recording Studios
- ✓ Yachts and RV's

The Platine Noirée surround system allows consumers to customize their home theater speaker system from a 2.1, 3.1, 5.1 to 7.1 configurations as it includes two main tower speakers (PN4521Black), a center channel speaker (PN4421Black), two dipole surround speakers (PN2421Black) and two rear monitor speakers (PN1411Black).

### SPECIAL FEATURES & HIGHLIGHTS

- Luxurious multi-layer Piano Black lacquer finish
- Slim modern living design, perfect for plasma/LCD TVs or homes with limited space
- Biampable towers and center channel
- Patented SLAPS Passive Radiator Technology (on the towers and center channel only)
- CNC machined aluminum base feet for the towers
- Vari-mount hanging system on the PN1411Black and PN2421Black
- Electroplated poly cone body woofers
- 1" enhanced line action silk dome tweeters
- Gold plated binding posts
- Low mass super fast poly injection cone bodies for enhanced accuracy
